

**Benny Hartnett**  
**Developer & AI Engineer**  
**Public Trust**

---

**WORK EXPERIENCE**

---

|   |                                |
|---|--------------------------------|
| <b>Lion Federal (Commercial)</b><br><b>Developer/AI Engineer</b>  | <b>July 2025 – Present</b>     |
| <ul style="list-style-type: none"><li>• Built LionPro.ai (commercial continuation of USAID's CACCI AI) serving GovCon, VC, law clients; shipped multi-tenant RAG with function calling and document generation capabilities.</li><li>• Delivered government contract opportunity scouting and capture tool, generates RFI/RFP full document responses in formatted client letterhead using LLMs from client artifacts, API sourced data, and web crawling extracts.</li><li>• Implemented custom integrations &amp; workflows using client requested APIs and custom built web crawlers.</li><li>• Stack: React + Tailwind, Python/Flask, MongoDB, AWS/Azure/GCP, Docker, Terraform, GitHub Actions.</li></ul>    |                                |
| <b>Lion Federal (Department of Labor)</b><br><b>Developer</b>   | <b>May 2024 – June 2025</b>    |
| <ul style="list-style-type: none"><li>• Developed new features and optimized existing functionalities within the Departmental E-Business Suite (DEBS) using C#, MVC, ASP.NET, and JavaScript.</li><li>• Efficiently resolved bugs and issues logged in Jira, improving the system's overall performance and user experience, using GitLab for version control.</li><li>• Developed and managed SQL queries and PowerShell scripts for scheduled jobs and automated tasks.</li></ul>   |                                |
| <b>Lion Federal (U.S. Agency for International Development)</b><br><b>Developer/AI Engineer</b>   | <b>Sep 2023 – October 2024</b> |
| <ul style="list-style-type: none"><li>• Proposed (Directed Subcontract Award), architected, and built an LLM-based internal knowledge chatbot system powered by retrieval augmented generation utilizing MongoDB as a vector database with a Flask API backend running in ECS and a React frontend (MVC).</li><li>• Developed function calling integrations with external APIs and an LLM-based system to allow natural language requests to query real-time data, and render custom charts and graphs.</li><li>• Created multimodal ETL pipeline utilizing embeddings, vision, and large language models to enable semantic search across a wide variety of document types, including images, for RAG.</li></ul> |                                |
| <b>Lion Federal (GSA Office of Inspector General)</b><br><b>Systems Engineer/Architect</b>  | <b>Oct 2022 – Sep 2023</b>     |
| <ul style="list-style-type: none"><li>• Planned and architected the migration of on-premises organizational Windows SMB file shares and home directories to Azure Files and OneDrive GCC.</li><li>• Migrated organizational email from IBM Notes Social Edition 9 to Exchange Online GCC.</li><li>• Provided systems administration/architecture guidance and PowerShell scripts to administrators.</li></ul>   |                                |
| <b>Lion Federal (Commercial)</b><br><b>Developer</b>  | <b>May 2021 – Sep 2023</b>     |
| <ul style="list-style-type: none"><li>• Developed various LLM-powered software using embedding, vision, and large language models with RAG and function calling capabilities for commercial customers and partners.</li><li>• Architected and developed high-impact technical solutions for clients including full-stack agile development of the LF Test Automation Framework, commercial IoT products, and financial/accounting systems.</li><li>• Partnership development (AWS, Microsoft, DataRobot, Ventera, and Pelatron Technologies) and individually authored federal proposals, resulting in \$4M+ in awarded defense contracts (U.S. Army ARD/DPRR).</li></ul>   |                                |
| <b>Lion Federal</b><br><b>Software Engineering Intern</b>   | <b>Mar 2021 – May 2021</b>     |
| <ul style="list-style-type: none"><li>• Assisting in the development of a native version of the LF Test Automation Framework.</li><li>• Programming with C#, Ruby, Selenium, and Cucumber.</li><li>• Performed automation testing Amazon Web Services Device Farm using AWS SDK.</li></ul>  |                                |
| <b>Tow Ninja</b><br><b>Lead Full Stack Developer</b>  | <b>Nov 2020 – Mar 2021</b>     |
| <ul style="list-style-type: none"><li>• Developed Tow Ninja Web Application and Database.</li><li>• Utilized ASP.NET/C# and Twilio SMS API to create notification system.</li><li>• James Madison University Summer Accelerator Startup Cohort.</li></ul>   |                                |

## CERTIFICATIONS

---

**Amazon Web Services (AWS)**

- Certified Developer - Associate 7/2022
- Certified Cloud Practitioner 5/2022

**Microsoft**

- Developer 2/2024
- Microsoft 365 Certified: Fundamentals 8/2022
- Microsoft Certified: Azure Fundamentals 7/2022

**Hugging Face**

- Fundamentals of MCP 5/2025
- AI Agents Fundamentals 4/2025

**Data Robot**

- Data Robot for Data Scientists 1/2022

**Uplimit & OpenAI**

- Building AI Products with OpenAI 2/2024

---

## AWARDED PROPOSALS

---

**Army DPRR – Information Technology Support Services**
**July 2024**

**Lead Proposal Writer** on \$13,094,625 prime award; drove win strategy, authored technical approach.

**USAID – CACCI AI (Directed Subcontract Award)**
**February 2024**

**Co-proposal writer & engineer**; wrote proposal documents, lead presentations, demoed, and developed prototypes for prospective government customers, leading to directed subcontract award of \$250,000.

**GSA OIG – IT Infrastructure Modernization (via DigiCloud Services JV)**
**October 2022**

**Co-proposal writer** on \$439,980.15 JV's (DigiCloud Services) first prime award; contributed to technical volume and past performance; staffed as Computer Systems Engineer/Architect on contract.

**Total awarded contract value: \$13,784,605.15**

---

## EDUCATION

---

**Computer Information Systems**, James Madison University  
Cum Laude

**May 2021**
