

Benny Hartnett Developer & AI Engineer Public Trust	
WORK EXPERIENCE	
Lion Federal (Commercial) Developer/AI Engineer - Built LionPro.ai (commercial continuation of USAID’s CACCI AI) serving GovCon, VC, law clients; shipped multi-tenant RAG with function calling and document generation capabilities. - Delivered government contract opportunity scouting and capture tool, generates RFI/RFP full document responses in formatted client letterhead using LLMs from client artifacts, API sourced data, and web crawling extracts. - Implemented custom integrations & workflows using client requested APIs and custom built web crawlers. - Stack: React + Tailwind, Python/Flask, MongoDB, AWS/Azure/GCP, Docker, Terraform, GitHub Actions.	July 2025 – Present
Lion Federal (Department of Labor) Developer - Developed new features and optimized existing functionalities within the Departmental E-Business Suite (DEBS) using C#, MVC, ASP.NET, and JavaScript. - Efficiently resolved bugs and issues logged in Jira, improving the system's overall performance and user experience, using GitLab for version control. - Developed and managed SQL queries and PowerShell scripts for scheduled jobs and automated tasks.	May 2024 – June 2025
Lion Federal (U.S. Agency for International Development) Developer/AI Engineer - Proposed (Directed Subcontract Award), architected, and built an LLM-based internal knowledge chatbot system powered by retrieval augmented generation utilizing MongoDB as a vector database with a Flask API backend running in ECS and a React frontend (MVC). - Developed function calling integrations with external APIs and an LLM-based system to allow natural language requests to query real-time data, and render custom charts and graphs. - Created multimodal ETL pipeline utilizing embeddings, vision, and large language models to enable semantic search across a wide variety of document types, including images, for RAG.	Sep 2023 – October 2024
Lion Federal (GSA Office of Inspector General) Systems Engineer/Architect - Planned and architected the migration of on-premises organizational Windows SMB file shares and home directories to Azure Files and OneDrive GCC. - Migrated organizational email from IBM Notes Social Edition 9 to Exchange Online GCC. - Provided systems administration/architecture guidance and PowerShell scripts to administrators.	Oct 2022 – Sep 2023
Lion Federal (Commercial) Developer - Developed various LLM-powered software using embedding, vision, and large language models with RAG and function calling capabilities for commercial customers and partners. - Architected and developed high-impact technical solutions for clients including full-stack agile development of the LF Test Automation Framework, commercial IoT products, and financial/accounting systems. - Partnership development (AWS, Microsoft, DataRobot, Ventera, and Pelatron Technologies) and individually authored wining federal proposals.	May 2021 – Sep 2023
Lion Federal Software Engineering Intern - Assisting in the development of a native version of the LF Test Automation Framework. - Programming with C#, Ruby, Selenium, and Cucumber. - Performed automation testing Amazon Web Services Device Farm using AWS SDK.	Mar 2021 – May 2021
Tow Ninja Lead Full Stack Developer - Developed Tow Ninja Web Application and Database. - Utilized ASP.NET/C# and Twilio SMS API to create notification system. - James Madison University Summer Accelerator Startup Cohort.	Nov 2020 – Mar 2021
PROFICIENCIES	
Languages & Frameworks:	Python, React, TypeScript, JavaScript, C#, ASP.NET, .NET MVC, Razor Pages, HTML, CSS, PowerShell, MS SQL, Terraform, Java, Bash, Selenium
Databases	MongoDB, MySQL, Microsoft SQL, DynamoDB, FAISS, ChromaDB
Technologies	Azure AI Foundry, AWS Bedrock, LangChain, LlamaIndex, Retrieval-Augmented Generation (RAG), AWS, ECS, Fargate, Lambda, CloudFront, API Gateway, EC2, S3, Azure, GCP, Microsoft 365 GCC, RESTful APIs, Windows Server, Amazon Linux, Raspberry Pi, ESP32, GitHub, GitLab, Jira, Docker, IBM Cognos
CERTIFICATIONS	
Amazon Web Services (AWS) - Certified Developer - Associate - Certified Cloud Practitioner	7/2022 5/2022
Microsoft - Developer - Microsoft 365 Certified: Fundamentals - Microsoft Certified: Azure Fundamentals	2/2024 8/2022 7/2022
Hugging Face - Fundamentals of MCP - AI Agents Fundamentals	5/2025 4/2025
Data Robot Data Robot for Data Scientists	1/2022
Uplimit & OpenAI Building AI Products with OpenAI	2/2024
AWARDED PROPOSALS	
Army DPRR – Information Technology Support Services Lead Proposal Writer on \$13,094,625 prime award; drove win strategy, authored technical approach.	July 2024
USAID – CACCI AI (Directed Subcontract Award) Co-proposal writer & engineer; wrote proposal documents, lead presentations, demoed, and developed prototypes for prospective government customers, leading to directed subcontract award of \$250,000.	February 2024
GSA OIG – IT Infrastructure Modernization (via DigiCloud Services JV) Co-proposal writer on \$439,980.15 JV’s (DigiCloud Services) first prime award; contributed to technical volume and past performance; staffed as Computer Systems Engineer/Architect on contract.	October 2022
Total awarded contract value: \$13,784,605.15	
EDUCATION	
Computer Information Systems, James Madison University Cum Laude	May 2021
